## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

- 6) ☐ Other: \_\_\_\_\_.

1. Receipt is acknowledged of the prior art information disclosure statements filed April 29, 2002 and June 07, 2002.

2. Claims 1-29 are pending in this application.

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-25, drawn to a pesticidal composition, classified in class 424, numerous subclasses depending upon the transition metal employed in the composition.
- II. Claims 26-29, drawn to a method of applying a pesticidal composition to an area, classified in class 424, numerous subclasses depending upon the transition metal employed in the composition.

4. The inventions are distinct, each from the other because:

The product and process claims are of different scope. Even if the scope were the same then the following would be applied:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the product as claimed can be used in a materially different process of using that product, e.g. mouthwash or lozenges.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention I or II to be examined even though the requirement be traversed (37 CFR 1.143).

6. This application contains claims directed to the following patentably distinct species of the claimed invention:

I. Whereby for the composition claims, the phenolic compound chosen from the group consisting of:

- a. carvacrol;
- b. thymol;
- c. carvacrol and thymol.

II. Whereby the salt of the composition claims which comprises a transition metal:

- i. nickel
- ii. copper
- iii. zinc
- iv. cadmium
- v. combinations of above-please specify the combination.

III. Whereby the pesticidal pest in the method claims is selected from the group consisting of:

- p. insects
- q. mites
- r. ova
- s. fungi
- t. microorganisms
- u. parasites
- v. combinations of above-please specify.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits [each species of I-III] to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic for the composition claims and claim 26 is generic for the process claims.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 1651

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

7. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to **Examiner Lilling whose telephone number is (703) 308-2034** and **Fax Number** is for applications **Before Final** (703) 872-9306 and **After Final** for applications is 703-872-9307 or SPE Michael Wityshyn whose telephone number is (703) 308-4743.
